Tesla S Sedan

Inverom delivers instrument clusters, touchscreen center consoles, telematics and other technologies to take the user experience to the next level.

For automotive original equipment manufacturers (OEMs), user experience is the difference between me-too and must-have products. Inverom brings vertically integrated innovation to the world's automotive leaders, from concept to customer, in fully reconfigured cockpits, driver information systems, telematics, electronic control units and more:

PREMIUM ALL ELECTRIC VEHICLE Developed and delivered 12.3-inch digital instrument cluster and 17-inch touchscreen with in-car 3G connectivity

PREMIUM HYBRID ELECTRIC SPORTS CAR Developed and delivered first ever reconfigurable cockpit, including TFT instrument cluster and TFT haptic touchscreen center console (navigation, multimedia, telematics and climate system)

PREMIUM ITALIAN SPORTS CAR MANUFACTURER Developed reconfigurable TFT instrument cluster

We create game-changing innovation. We integrate development, manufacturing and distribution. We accelerate time to market, cost reduction and competitive advantage.
