

CREATE. INTEGRATE.
ACCELERATE.

Advanced energy management/battery protection technologies are central to the safety and performance of electronic vehicles.

power.

Fisker-Karma Instrument Cluster

Inverom Li-ion BMS solutions deliver a wide variety of stored energy applications.

From green transportation to mobile devices, stored-energy innovation powers the future. Inverom powers original equipment manufacturer (OEM) success with full Li-ion BMS capabilities—vertically integrated expertise in design, development, manufacturing and distribution—in virtually any rechargeable energy storage application:

- PCM technology
- PMM systems
- Smart chargers

We create game-changing innovation. We *integrate* development, manufacturing and distribution. We *accelerate* time to market, cost reduction and competitive advantage.
